Task

- **Task:** 3

- **Level:** 0

- **Deadline:** 13/3/2025

My name is **Youssif**, and I've finally achieved my dream of opening a restaurant called **Mshtsht**. We've been open for a while, but I'm not getting many customers. Some friends suggested that having a website could help more people find us, order online, and reserve tables easily.

I don't know how to build a website, so I need your help! Here's what I want:

Navbar

- Our **restaurant logo** on the left (I want the logo to be a circle).

- Our **restaurant name** next to the logo.

- A **small bottom border** to make the navbar look better.

- Links to help users move around the page.

Menu Section

- The menu should be **divided into categories** (Appetizers, Main Dishes, Desserts, Drinks).

- Each item should be in a **card** with:

    - A **picture** of the food

    - The **name** of the dish

    - A **short description**

    - The **price**

    - A **"Buy" button**

- I will send you the menu details.

- I also made a **quick sketch** of how I want the menu to look (sorry if it's not the best drawing! 😆).

Reservation Form

- A form where users can **reserve a table**.
- The form should include:
  - **Name**
  - **Email**
  - **Phone number**
  - **Number of guests**
  - **Date & time selection**
  - **Extra notes** (a textarea for special requests)
  - **Submit button**

Footer

- A simple footer with a **copyright message:"© 2025 Mshtsht. All Rights Reserved."**
